

## Do You Want To Touch Me There

a noody tune

November leaves are blowing everywhere  
and the sun's light is shining through  
here I sit in my windowpane  
and all night I been watching you

we should be together  
but this world won't let it be  
and grey clouds enshroud my day

girl, I'll stay up all night and talk with you  
I don't really care  
as long as I could hear you say

do you want to touch me there  
do you want to touch me there  
do you want to touch me there

I remember the first time I saw you  
you were walking home from school  
you didn't even look in my direction, baby  
but I'm not one to play the fool

so I jumped outside my car window  
and went running after you  
I knew we were destined to meet

you turned around and looked at me  
placed my hands on your derriere  
pulled me close and whispered sweet

do you want to touch me there  
do you want to touch me there  
do you want to touch me there

Saturday night we went down to Friday's  
for a nice expensive meal  
it was 2 for 1 night, baby  
and let me tell you, that's quite a deal

(horn solo)

later that night after four hours of sweet love  
I was lying next to you  
we shared a pack of camel lights

with the moonlight glistening off your braces  
I knew right then and there  
that there'd be no more sleepless nights

‘cause you let me touch you there  
‘cause you let me touch you there  
‘cause you let me touch you everywhere!
